ANU RANJAN SINGH

QA Engineer | API Testing (Postman) | Selenium Automation | JIRA & Defect Lifecycle | Agile/Scrum
Noida, Uttar Pradesh, India | 7001547744 | 111.anuranjansingh@gmail.com | linkedin.com/in/anu-ranjan-qa
Notice Period: 30 Days (Negotiable) | *Open to Relocate: Yes*

PROFESSIONAL SUMMARY

4+ years of QA experience in BFSI. Currently working across the full STLC on a live banking platform. Primary focus is API testing in Postman. Spent the past year building hands-on experience with Selenium WebDriver automation too. Manages the defect lifecycle end-to-end in JIRA and ServiceNow. Works closely with developers and business teams — the goal is usually to find the actual root cause, not just log the ticket and move on. Some exposure to applied AI tools as well, picked up through internal certification coursework.

CORE COMPETENCIES

API Testing: Postman — REST API, JSON/XML validation, request/response troubleshooting
Automation: Selenium WebDriver with basic Java. Form automation, data-driven input validation. Picking up new frameworks as needed
Testing Types: Manual, Functional, Regression, Smoke, Sanity, Integration, UAT, Cross-Browser
Defect & Ticket Management: JIRA, ServiceNow, Zephyr. Root cause analysis, requirement traceability
Process & Methodology: STLC, SDLC, Agile/Scrum — sprint planning, stand-ups, retrospectives. Test case and test data design
Database & Backend Testing: Oracle SQL, MySQL, PostgreSQL for backend data validation
AI Usage: Uses Claude and ChatGPT day to day for drafting test cases. Purple Fabric AI Certification, Business Impact AI Course

PROFESSIONAL EXPERIENCE

Associate QA Consultant — Jun 2025 – Present

Intellect Design Arena Limited (Payroll: Litmus Information Systems LLP)

Client: HUDCO (Government of India) | Domain: Banking/BFSI | Project: Loan Origination System (LOS) & Loan Management System (LMS) — QA & Production Support

- Write and execute test cases for every Change Request on the LOS/LMS platform. Covers functional, regression, smoke and sanity testing across monthly release cycles on a live government banking system.
- Test REST API endpoints in **Postman** before each release. Catches response mismatches early instead of letting them reach production.
- Started automating repetitive web-form testing with **Selenium WebDriver** last year. Fills forms with different data types, checks the results. Frees up more time for exploratory and edge-case testing.
- Handle incidents, defects, queries, CRs and SRs in **ServiceNow and JIRA**. Traces issues back to root cause, follows the defect lifecycle through to closure.
- Takes part in sprint planning and stand-ups. Works directly with developers when something breaks in production.
- Run **Oracle SQL** queries against the backend to validate data before it reaches UAT. Has caught a fair number of defects at this stage.
- Dig into server logs through WinSCP when a release error needs tracing, to speed up root-cause analysis.

Associate Executive – QA — Feb 2022 – May 2025

IRIS Software Technologies Pvt. Ltd.

Domain: Enterprise Web & Mobile Applications | Project: HRMS Portal (iTime) — Timesheet, Billing, Payroll & HR Processes

- Tested REST API JSON/XML responses in **Postman** for every release. Helped catch data-mapping issues before deployment.
- Covered manual, functional, regression and integration testing for web and mobile releases each sprint, working within an Agile team.
- Tracked defects across attendance, leave, timesheet and payroll modules. Kept a solid defect-acceptance rate with the dev team.
- Put together a reusable test case library for the HRMS portal — made regression cycles faster and helped new QA hires get up to speed quicker.
- Ran SQL queries on MySQL and PostgreSQL to check backend records against what showed up on the UI, particularly after major releases.
- Tested across Chrome, Firefox and Edge to keep the HRMS portal experience consistent.

CERTIFICATIONS

- Intellect Purple Fabric AI Certification
- Business Impact AI Course (Intellect Design Arena Ltd)
- IRIS API Testing Training — Internal Certification
- ISTQB Foundation Level: Trained (Udemy); Certification Exam Pending
- Udemy SQL Bootcamp

EDUCATION

B.Tech – Information Technology, West Bengal University of Technology (WBUT), 2014 – 2017
